Hoppt Concrete Cutter

HCC16A/HCC20A

Walk behind Concrete Cutter

The Hoppt range of walk behind Concrete Cutters have been engineered for high performance, reliability and durability. Whether cutting concrete or asphalt, the reinforced steel box frame adds the strength necessary to reduce vibration while sawing. All Hoppt's Concrete cutters come with a durable plastic water tank to increase durability and eliminate the problem of rusting.

Features and Benefits

- The high horsepower engine is encased within a protective frame, ensuring maximum durability
- New and improved control panel interface, giving you an easy to use interface
- A storage box is located at the rear of the cutter to provide convenient access to work drawings
- Digital tachometer installed on the panel
- Durable polycarbonate engine cover to protect the engine from debris and splash, prolonging its lifespan
- Tilt able water tank providing convenient access to the engine for refuelling or maintenance
- Carrying hook integrated into the design enabling easy transportation of the cutter

Specifications	HCC16A	HCC20A
Dimension - LxWxH (mm)	1,015x563x958	1,557x558x1080
Operating Weight (kg)	130	158
Maximum Cutting Depth (mm)	150	175
Blade Size (mm)	250 - 400	350 - 500
Water Tank Capacity	26	
Engine	Honda GX390 9.6kW – 4 stroke Petrol	
Drive Mechanism	Manual
