

Platforms and Stairs

PRODUCT DESCRIPTION

FRP grating products are ideally suited for use in platforms and stairs, as are “C” Channels, Angles, “I” Beams and various other FRP profiles.

Composite Engineering can build complete staircases incorporating handrails and landing areas.

All structures are built to order so any size and configuration is possible. Many more examples are available.

APPLICATIONS

As Platforms and Stairs can be built to order they are ideally suited to any situation where sound, non-slip elevation and access is required or combined with ramps and handrails for disabled access.
